

A photograph of a man in a dark suit standing in an office, looking out through a large window at a dense city skyline. The scene is bathed in warm, golden light, suggesting either sunrise or sunset. In the foreground, on a desk, there is a pair of glasses, a small glass of water, and some papers.

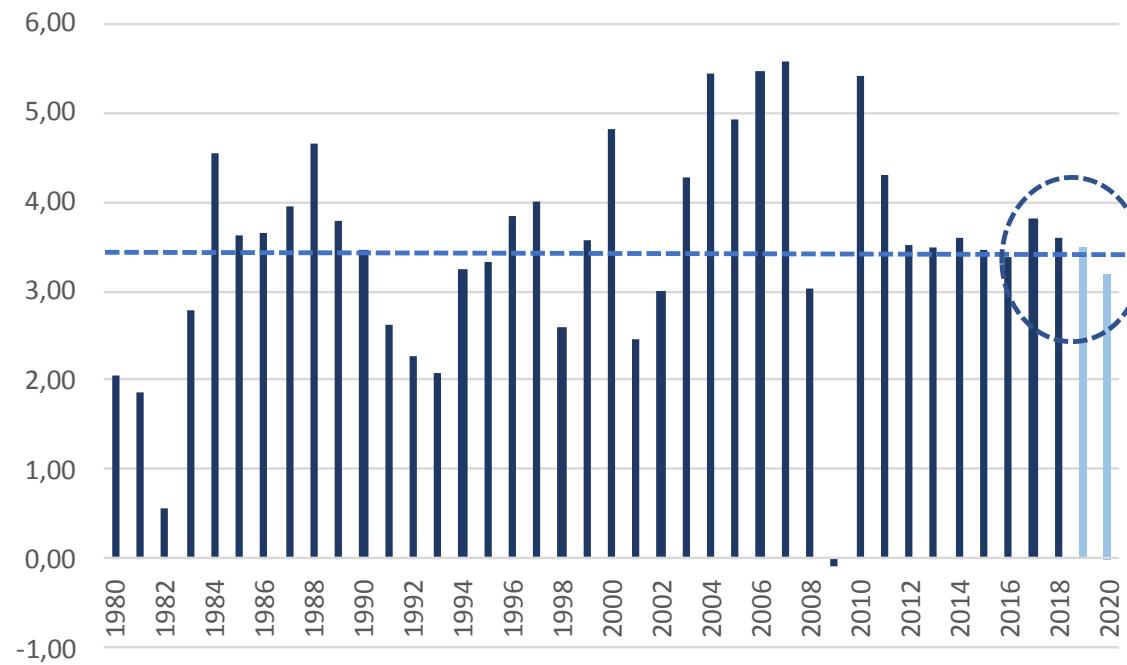

# Brazil: Better Fundamentals

# Brazil: Global Growth does Matter

Brazilian GDP and commodity prices (%)

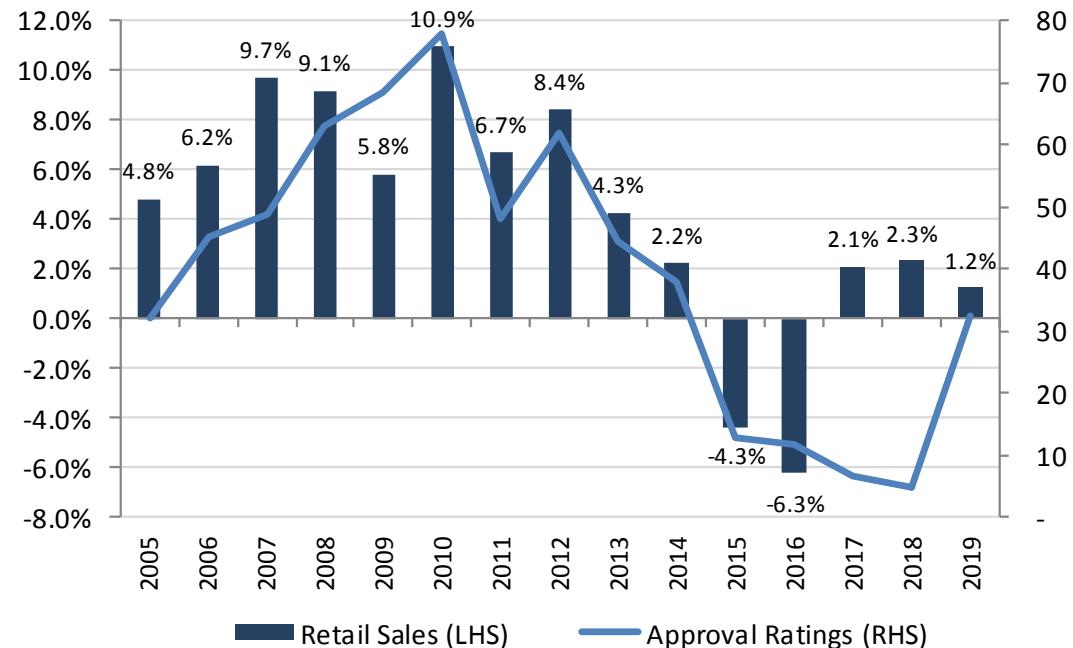

**Besides the relevance of confidence, real income and interest rates, commodity prices have been a major drive for local growth**

Sources: IMF and Banco Votorantim.

# Crisis has been an opportunity

Approval rating and retail (%)

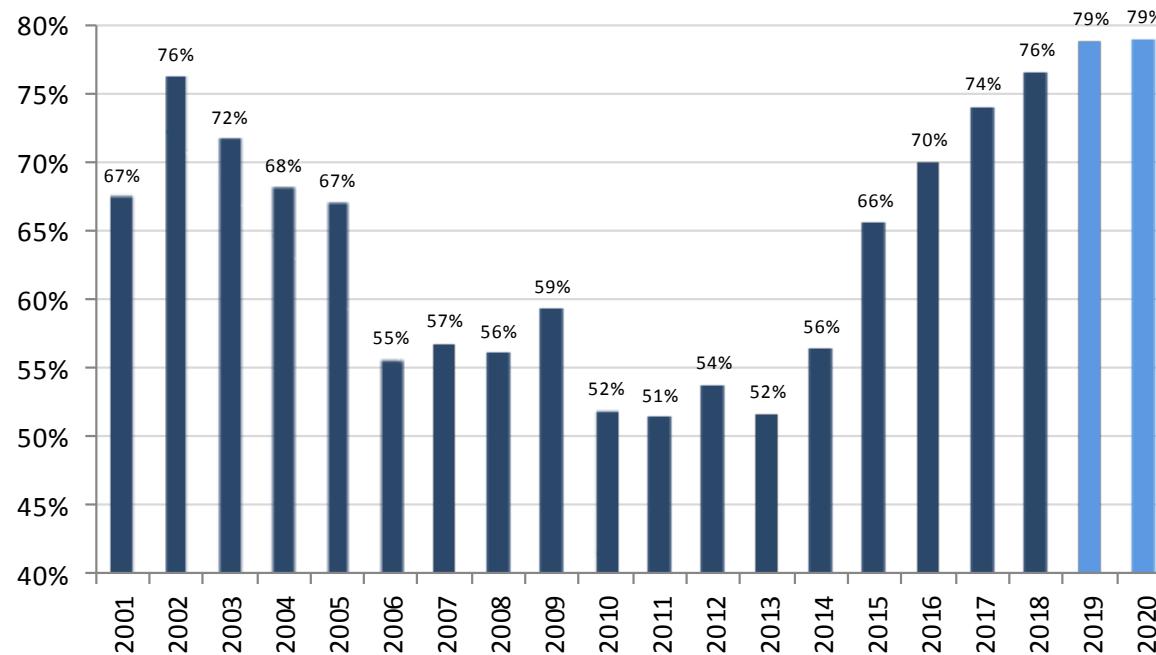

Brazil has delivered a clear policy response. Due to the relation between economics and politics – that has explained elections, governability and policy choices – crisis has been an incentive for reforming and adopting responsible policies.

# Key Challenge is Stabilize Debt

Gross Public debt (% GDP)

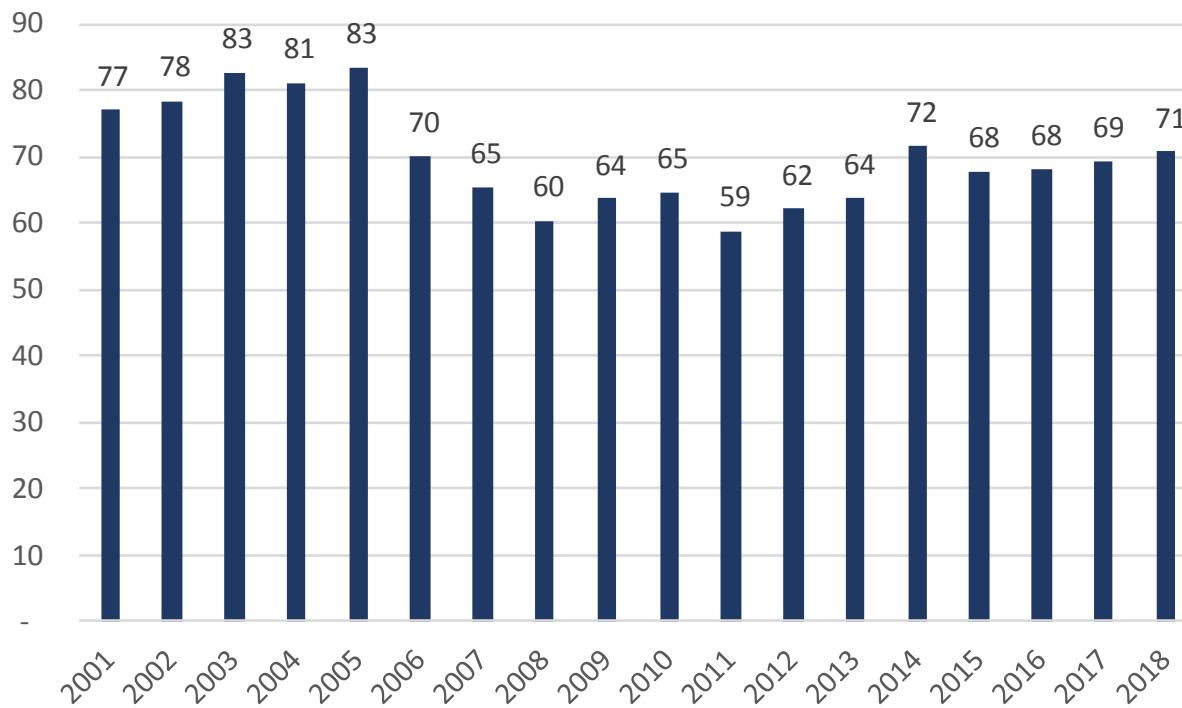

Sources: Brazilian Central Bank and Banco Votorantim.

Fiscal reforms have played a relevant role to stabilize the public debt. Pension fund reform, lower local rates and one-off revenues has been key to stabilize the debt. Looking forward, the administrative reform is another relevant step.

## External Debt: Low and Stable

External debt (US\$ billion)

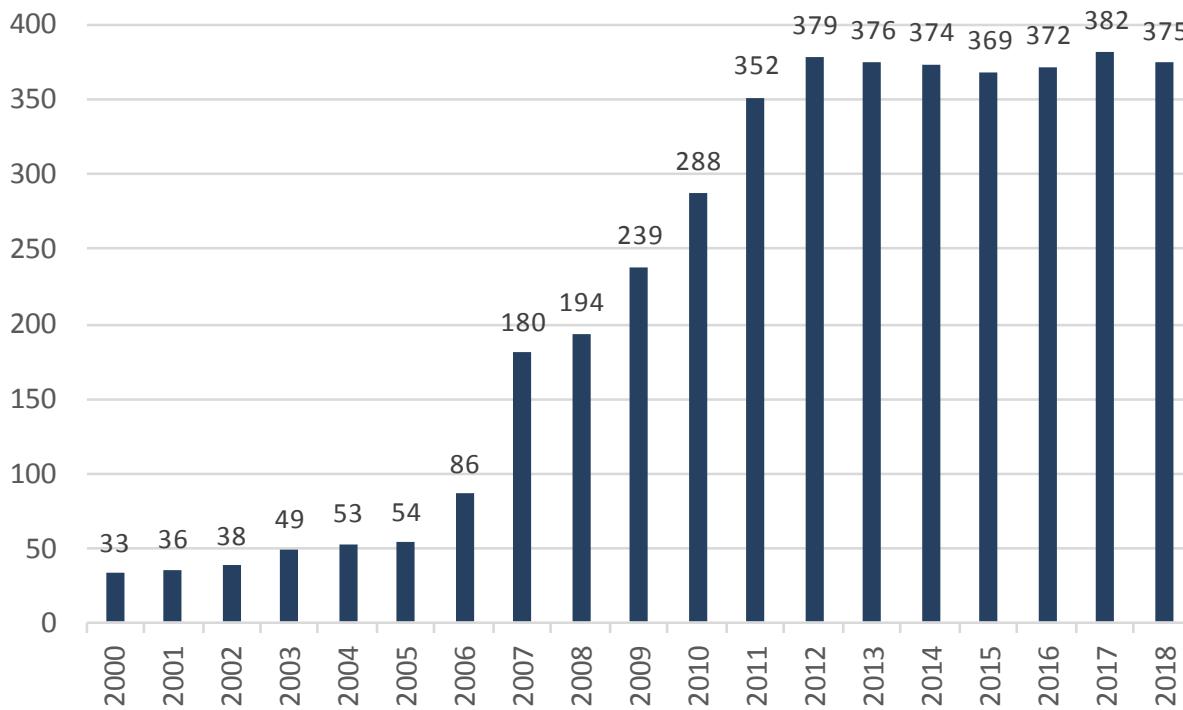

Since external debt  
has been running  
around US\$ 70  
billion, solvency  
conditions have  
improved.

# Recession and Fundamentals Anchored Inflation

Current and expected inflation (IPCA annual %)

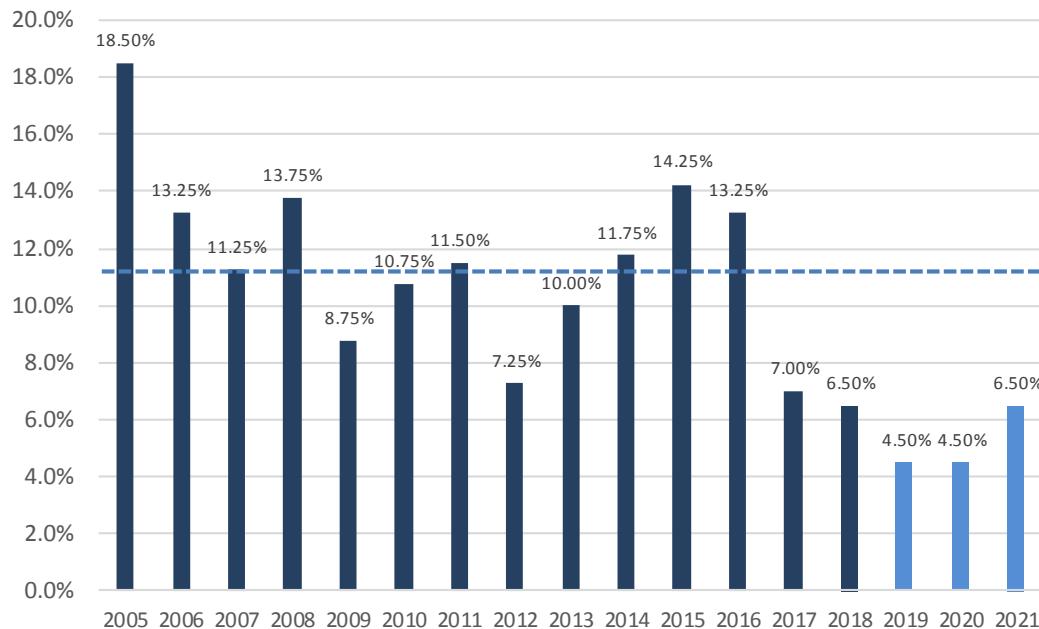

Source: IBGE and Brazilian Central Bank.

**2014 recession,  
improving fiscal  
fundamentals and the  
Brazilian Central  
Bank's credibility have  
led to a new  
inflationary pattern.**

# Inflation Creates Room for Low Interest Rates

Selic rate (%)

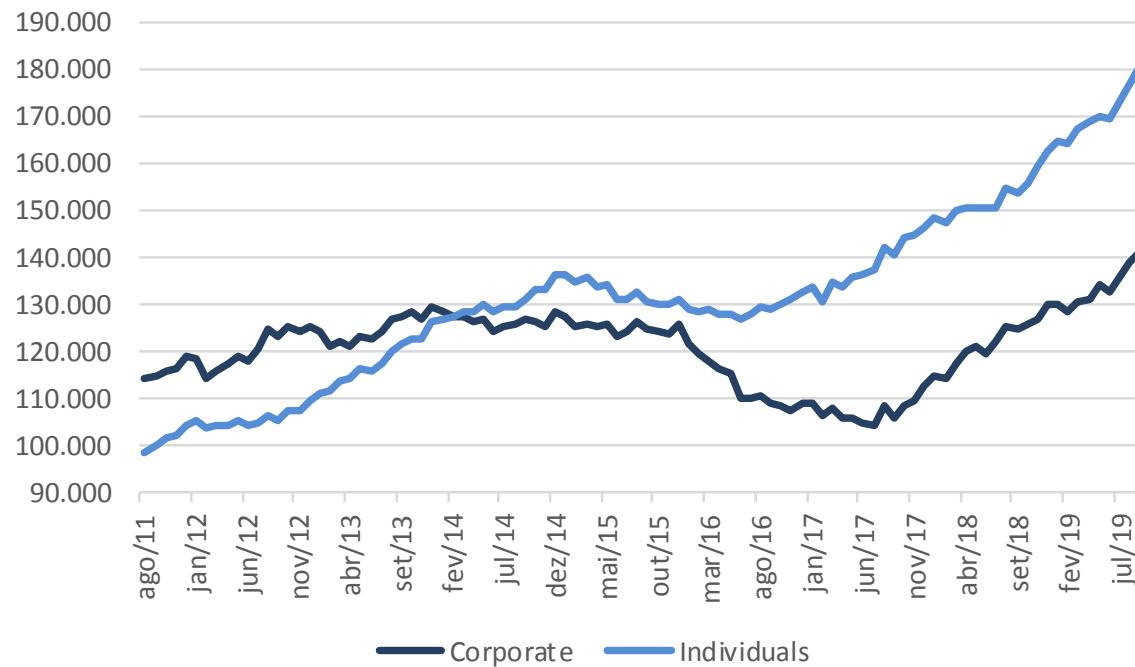

Source: Brazilian Central Bank and Banco Votorantim.

**Low growth and inflation have paved the way for low interest rates. However, lower deviations in inflation and output are behind the Selic's convergence to its neutral level.**

# Credit Sustains a Clear Rebounding

Lending (real terms 6-month moving average)

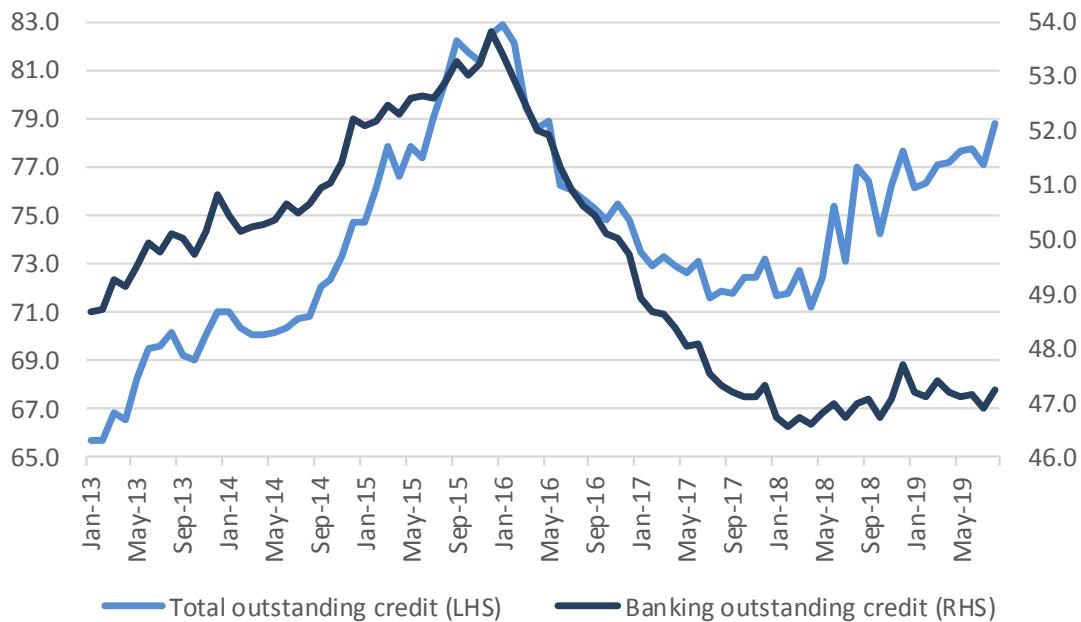

**Credit increases local resilience to global shocks. At this point, corporate credit is poised to be a leading variable for the economic recovery.**
